How Small Merchants in Africa are Using Superplatforms

Thursday, 28 February 2019

Anne Gachoka . John Won

Before we start...

1. Our session will be approximately 1 hour:
25 min for presentation; 25 min for panel; 10 minutes for questions.
2. Questions and comments may be posted at any time during the session by clicking the Q&A tab at the bottom of the webinar screen.

3. Today's webinar is being recorded. A link of the recording will be shared after the event.

About FIBR

FIBR (Financial Inclusion on Business Runways) is an innovative R&D project which seeks to demonstrate how smartphones can accelerate and deepen financial inclusion in developing countries. The project identifies small businesses as vital nodes as their rate of smartphone adoption is already much higher than the population as a whole and they interact and transact with a web of low-income employees, suppliers and customers on a daily or regular basis. By focusing on this indirect channel to financial inclusion, FIBR aims to identify and harness the energies, advantages and experiences of new partners in nonfinancial sectors to the challenge of the next generation of financial inclusion initiatives.

fibr

BFA

Superplatforms

Digital platforms dominant across more than one sector, such as social networks and e-commerce

fibr

BFA

MSMEs in Africa:

90 percent of commerce in informal channels
70 percent of region's total employment
\$100 billion MSME credit gap

fibr

BFA

Project Overview

1.

Understand current merchant behaviors and practices relating to superplatforms

2.

Determine the value proposition of superplatforms to merchants and vice-versa

fibr

BFA

Superplatform Hypotheses

HYPOTHESIS 1

Merchants do not have to be fully digital to sell online.

HYPOTHESIS 2

B2B services by superplatforms are essential for MSMEs to increase their chances of success.

HYPOTHESIS 3

E-commerce strategies can increase the chances for young adults (18-35 years of age) to generate income or find employment.

fibr

BFA

How We Conducted Our Research

Qualitative Interviews

13 In Depth Interviews with merchants

- 5- Dealing with Imports (clothes, shoes, cosmetics, watches and electronics)
- 4-Dealing with services- hospitality, entertainment, App promoter
- 3-Dealing with food vending
- 1-Artisan

2 FGD

- End customers-8 Respondents
- Merchants-7 Respondents

Quantitative Interviews

Data from Facebook surveys in TZ, KE and GH

375 responses across three markets. Survey ran about 1.5 months and was targeting small merchants who have sold online.

What We Learned

About Merchant Needs

INSIGHT 1

Trust is a constant variable in online selling, driving or inhibiting interactions.

MSMEs and customers have developed strategies to assess, build, manage, and make decisions based on level of trust during the online experience.

fibr

BFA

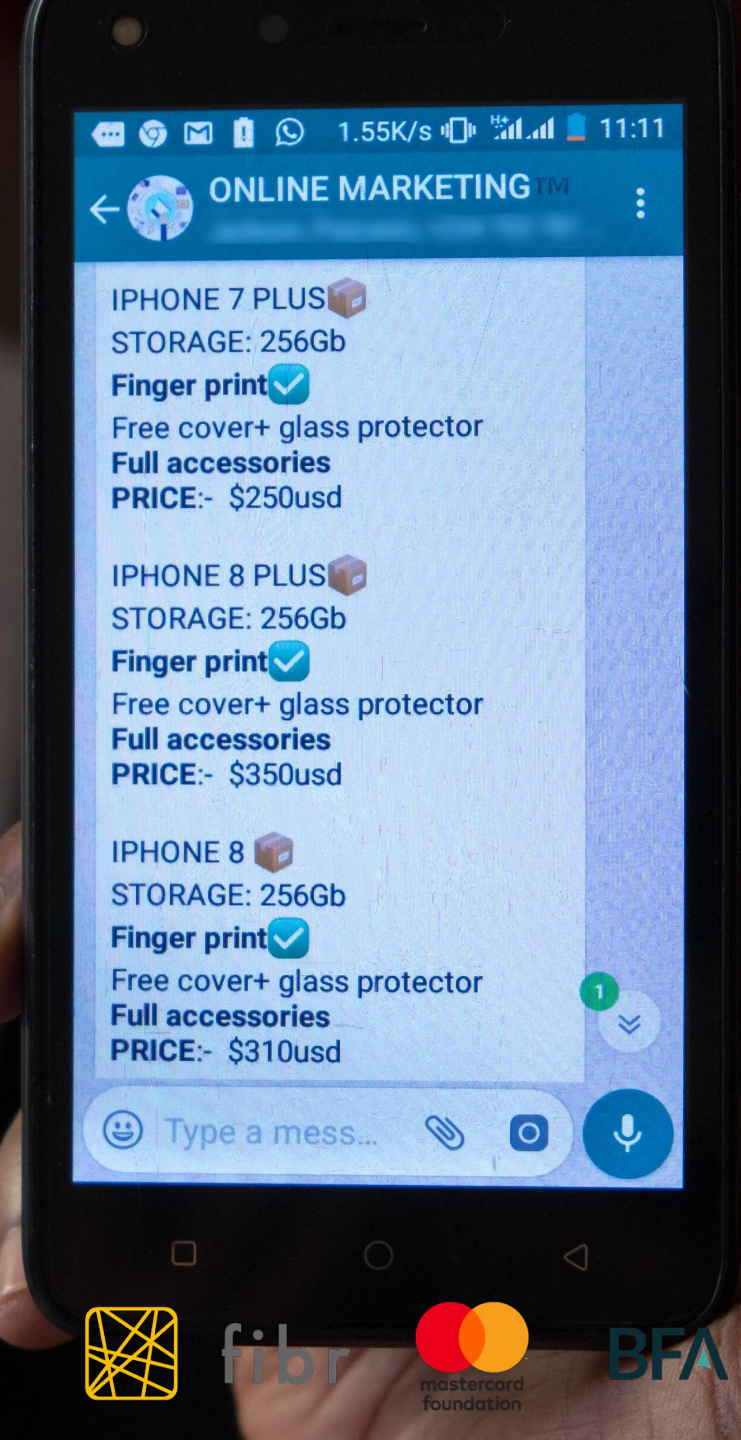

How do you find products & services online?
Circle the services you use. Place an X on services you don't use.

INSIGHT 2

Few MSMEs use advanced business tools, especially paid services

It's hard for online MSMEs to break the bottleneck by using advanced tools or sharing labor.

fibr

BFA

fibr

BFA

INSIGHT 3

MSMEs desire access to more ways to buy products and supplies

Many MSMEs lack formal accounts and payment options which limits their ability to purchase from larger suppliers like Alibaba or Amazon.

fibr

BFA

fibr

BFA

A woman wearing a black hijab and a gold patterned jacket is seated at a dark wooden table, gesturing with her hands as if speaking. To her left, a man in a light blue suit and glasses is seated, looking towards her. The background shows a room with a window, a black leather chair with red armrests, and a water bottle on the table.

INSIGHT 4

Online MSMEs don't have access to or use traditional financial services.

As MSMEs develop active businesses, they continue to struggle with working capital and access to credit.

fibr

BFA

SUMMARY OF INSIGHTS

Online MSME Journey

Accessing Working Capital & Tools

CONCEPT SPOTLIGHT

In-Kind Credit

Supplier credit offered by e-commerce platforms give MSMEs payment flexibility to offset working capital shortages

Sokowatch is an e-commerce platform that supplies informal merchants in Africa. Merchant can order products at anytime via SMS or mobile app, and receive free same-day delivery to their store. Based on historic purchasing data, Sokowatch evaluates retailers to provide them with access to in-kind credit.

FIBR
Projects

Sarafu (Azam Pay) is a mobile-payment system that enables merchants to order stock and receive priority delivery. Sarafu allows merchants to pay on delivery, as well as digital-credit options that are similar to the informal in-kind credit that many merchants receive from suppliers.

fibr

Formalizing & Scaling Up

A FIBR
Project

CONCEPT SPOTLIGHT

Micro-consulting WhatsApp Group for MSMEs

A FIBR-led WhatsApp group pilot to test value-add services MNOs and FSPs could offer agents. Over 6 weeks, mobile money expert offered 20 mobile money agents advice on key aspects of running and growing their agent business: specific knowhow about commission structure, managing customers, technology usage, fraud, access to credit, as well as peer-to-peer sharing/learning.

Image credit: TechnoServe Smart Duka program trains shopkeepers how to manage their business better

Micro-consulting Pilot Highlights

- High potential for enabling linkages with MNOs and FSPs
- A game changer for young business owners
- Active engagement across the board
- 100% Net Promoter Score
- 0% Attrition
- 80%+ Agents actively incorporated advice in business
- 90% Agents wanted this service to continue (n=20)
